OBJECTIVE

Cloud engineer with 3 years 10 months of experience across cloud infrastructure, deployment automation, and DevOps, currently a Cloud Support Associate at Amazon Web Services. 3× AWS Certified and HashiCorp Terraform Certified, with hands-on expertise across the AWS Developer Tools suite, Elastic Beanstalk, and modern AI-assisted development workflows. Seeking to drive cloud solutions for enterprise customers while advancing toward Solutions Architect and Cloud Engineering roles.

WORK EXPERIENCE

Cloud Support Associate

Nov 2024 – Present

Amazon Web Services

Hyderabad, Telangana

- Resolve enterprise customer cases across the AWS Developer Tools suite (CodePipeline, CodeBuild, CodeDeploy, CodeCommit) and Elastic Beanstalk, sustaining 95% CSAT
- Debug build failures, deployment errors, and infrastructure misconfigurations; guidance and root-cause analysis contributed to a 30% drop in customer deployment failures
- Leverage Amazon Q Developer, AWS DevOps Agent, AWS Transform, and Kiro to accelerate triage, diagnosis, and customer-facing recommendations
- Authored knowledge-base articles, internal runbooks, and bug/feature reports that drove service improvements and reduced repeat-case volume

Systems Engineer

Jul 2022 – Nov 2024

Infosys

Hyderabad / Mysore

- Owned the CUCM build train and ISO generation process for bi-weekly enterprise releases
- Optimized end-to-end Jenkins CI/CD pipelines, reducing CUCM build time by 30%
- Built and maintained Docker container environments for CUCM components, supporting development and QA teams
- Managed Git workflows (PRs, code reviews, merge conflicts), build dependencies, and authored SOPs and troubleshooting guides

PROJECTS

AWS Three-Tier Web Architecture | *EC2, ALB, Aurora MySQL, Auto Scaling, VPC, Nginx, Node.js, React*

- Built a highly available three-tier app with React/Nginx web tier, Node.js app tier, and Aurora MySQL DB tier, with dual ALB architecture and multi-AZ failover
- Designed secure network with public/private subnet split, NACLs, and tier-scoped security groups; auto-scaling groups across all tiers for elastic capacity

Elastic Beanstalk App with Load Balancer & HTTPS | *Elastic Beanstalk, RDS, S3, ALB, ACM, Route 53*

- Deployed a scalable web application on Elastic Beanstalk with custom domain, ACM-issued SSL/TLS, and ALB for high availability; achieved 99.9% uptime
- Configured auto-scaling and right-sized environments to cut idle compute spend while sustaining traffic spikes without performance degradation

CI/CD Pipeline for Web Application Deployment | *CodeCommit, CodePipeline, CodeBuild, Elastic Beanstalk, S3, I*

- Built an end-to-end CI/CD pipeline from CodeCommit to Elastic Beanstalk, reducing manual deployment effort and cycle time by 50%
- Integrated automated tests in CodeBuild, decreasing post-deployment issues by 30% and enabling safer, more frequent releases
